SUMMARY

PROBLEM

-  Academic Research Findings:
-  Current Problems:

- Academic Research Findings:

- Universities intentionally maintain topic consistency for fair Exam (Research.com)
- Questions don't repeat exactly, but CONCEPTS do (Study 2024)
- 70% students use AI tools under time pressure (Stanford 2024)
- Students who analyze PYQ patterns score 35% higher (Learning Analytics)

- Current Problems:

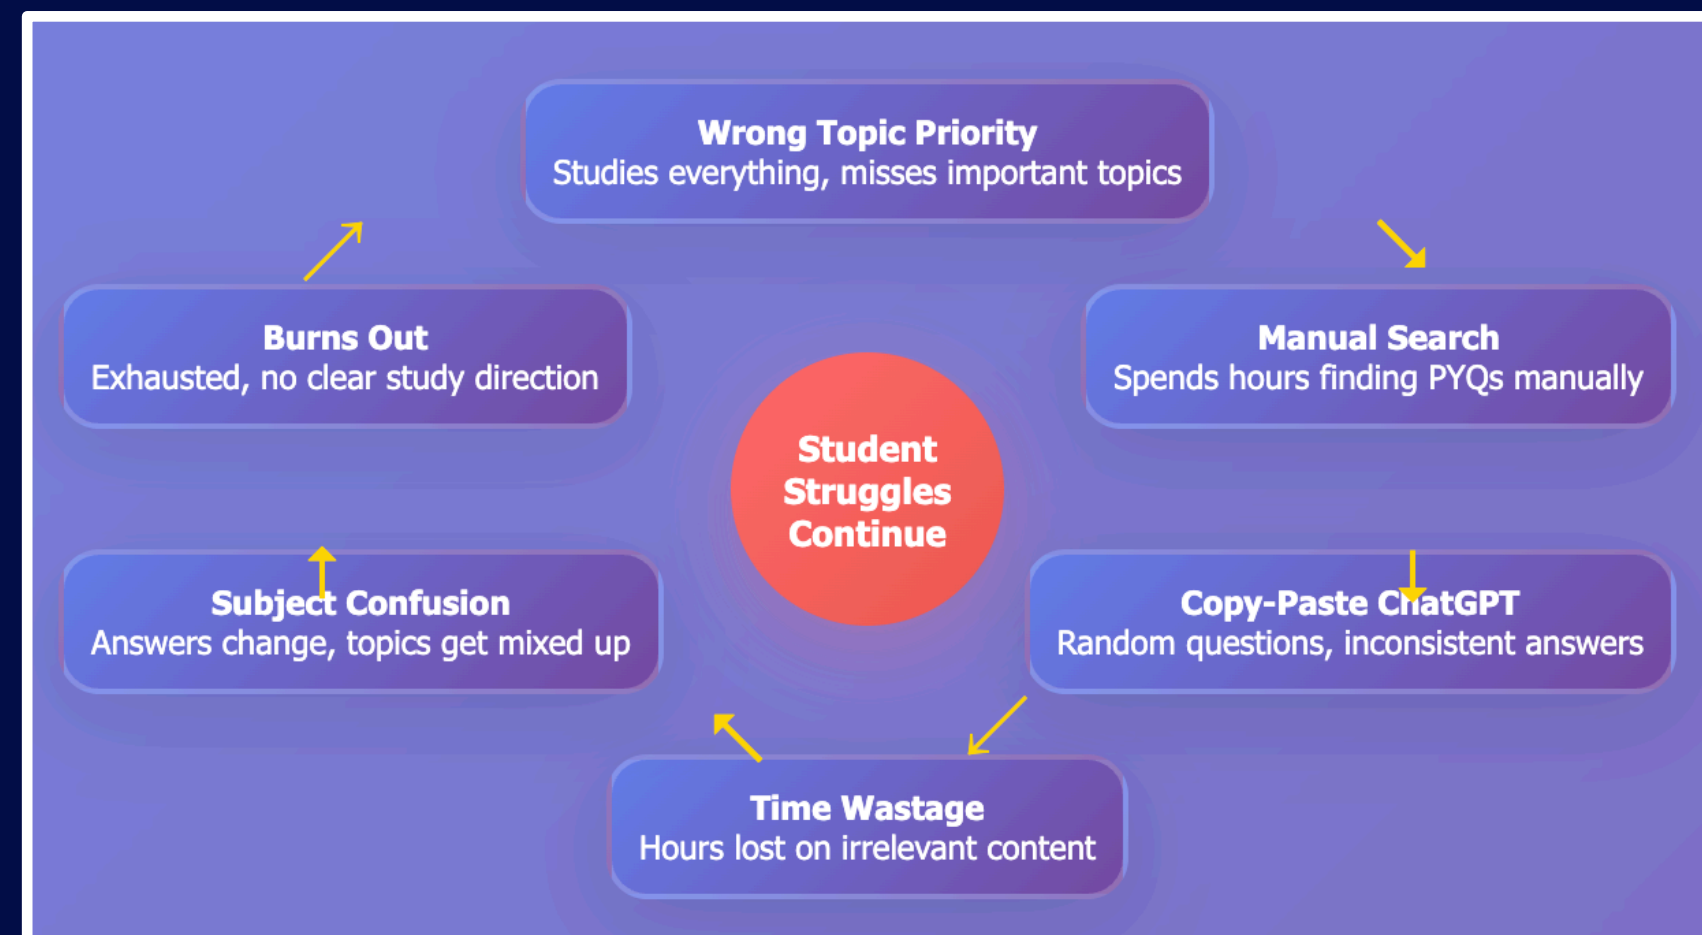

- Students manually analyze 100s of questions (Time Wasting)
- Information overload
- 60% students miss important patterns in PYQs
- Random ChatGPT questions don't align with syllabus

INSPIRATION

-  Short story
-  A Struggling System:

- Short story

Before exams, I had just 1–1.5 weeks to prepare all the time . Friends who scored low asked me which topics mattered most, but I struggled—going through the syllabus, scanning PYQs, and even trying Ai to help, which was slow and inconsistent.

🤔 A Struggling System:

- Short story

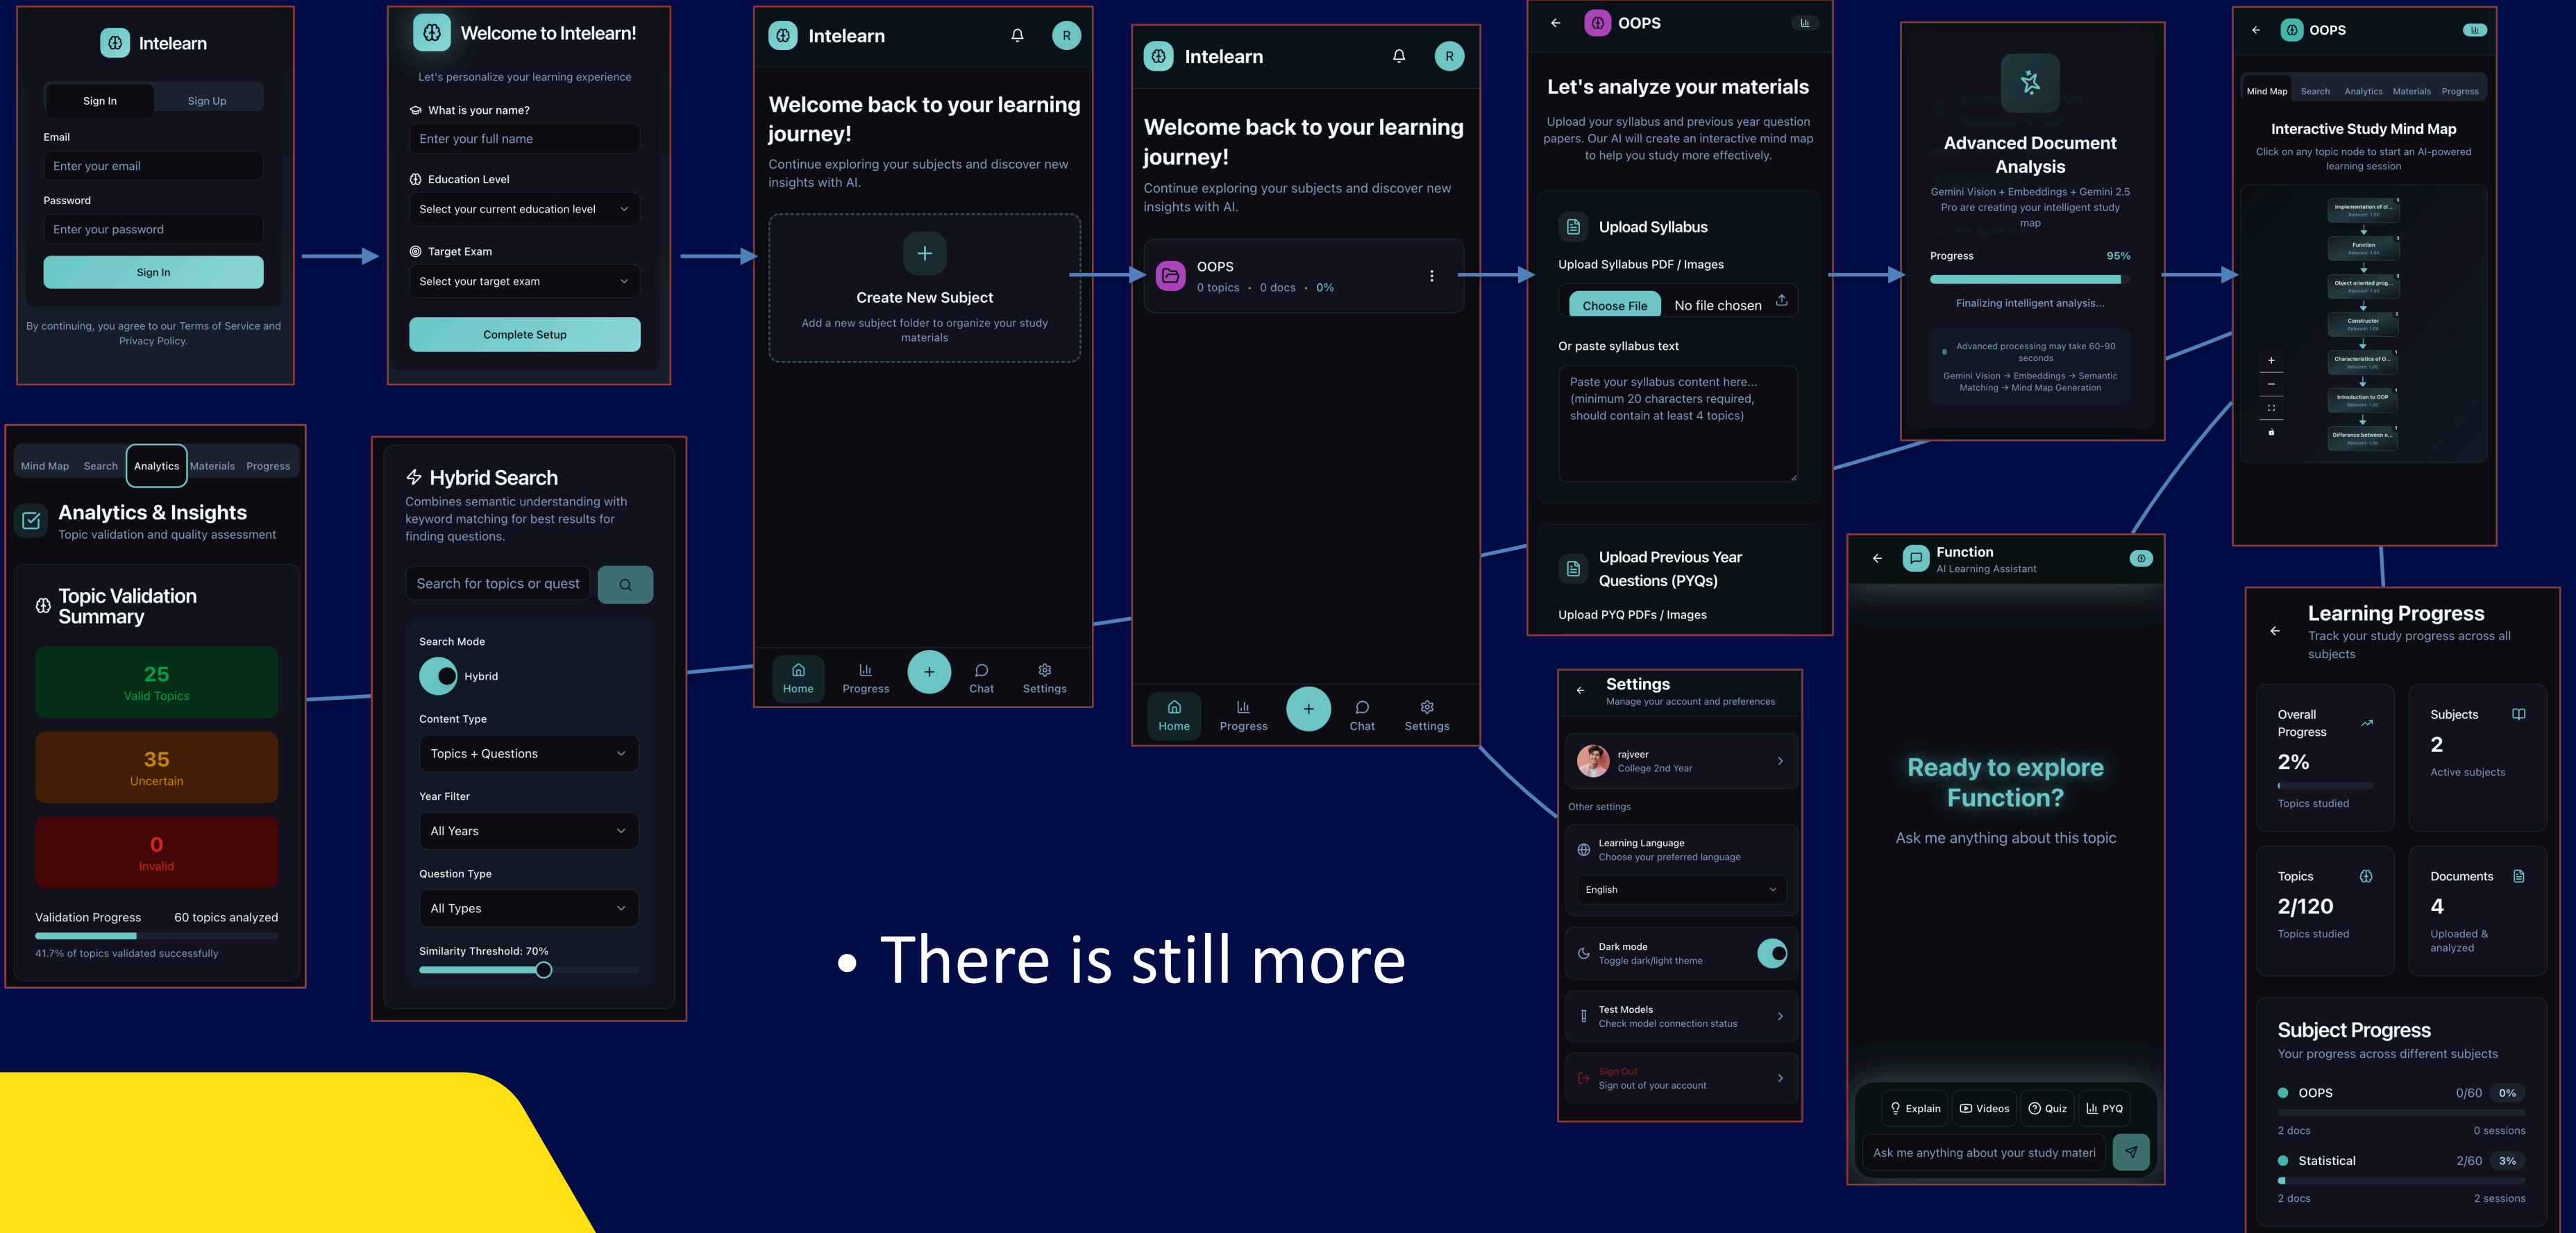

This repeated struggle inspired me to build  Intelearn – a platform that automatically analyzes syllabus, PYQs, and highlights the most important topics using AI and the 80/20 rule. Now, instead of wasting time searching, students can directly focus on what matters most.

SOLUTION

-  App Design
-  App Feature
-  App Architecture

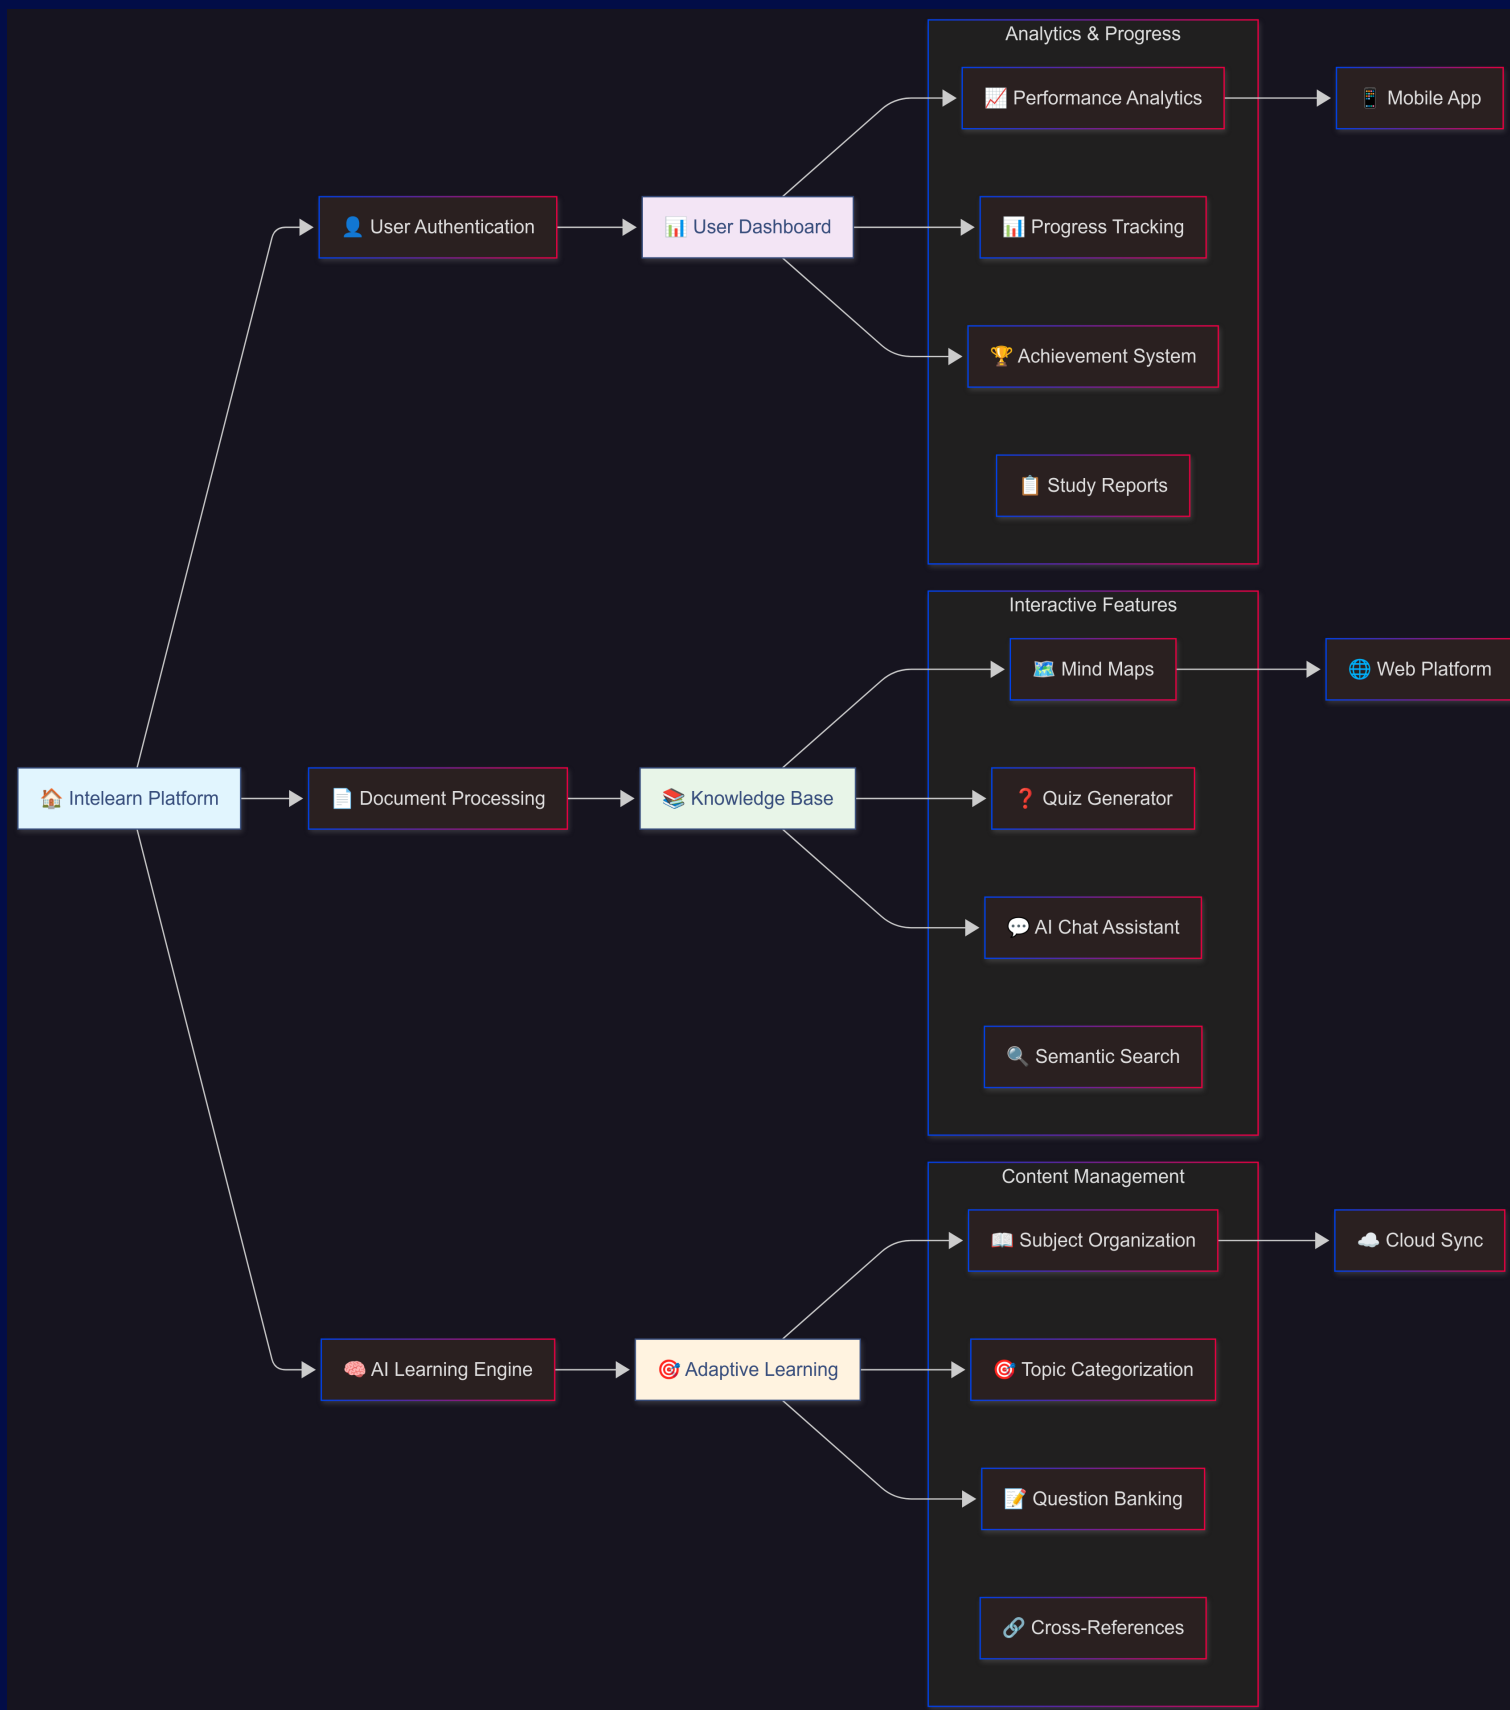

App Design

• There is still more

• App Features

• **User Dashboard** → Performance analytics, progress tracking, study reports, In future - achievements (Mobile-ready)

• **Document Processing** → Smart content extraction, syllabus + PYQ analysis, knowledge base

• **Interactive Tools** → Mind maps, quiz generator, AI chat assistant, semantic search (Web platform)

• **Adaptive Learning** → Personalized recommendations, subject organization, topic categorization, question banking

• **Models used** → Gemini-2.5-flash, gemini-1.5-flash-latest, text-embedding-004, Google Cloud Text-to-Speech

Business Model

Free Plan: Get Started

Instant Syllabus Analysis: Limited no. Of subject .

AI-Powered Chat: Engage in up to 20 conversations with our AI tutor to get answers and explanations.

Basic Quizzes: Generate up to 5 quizzes to get a taste of our adaptive learning engine.

and more...

Premium Plan: Study Smarter

- For a subscription, users unlock powerful tools for better grades.
- This includes unlimited subjects, an advanced AI chat tutor, personalized quizzes, and detailed progress tracking and realtime group discussion.

Impact & Vision

- Democratize education using AI
- Help average students pass.
- Hardworking students excel.
- Scalable to JEE, GATE, CAT, NDA & more

Summary – Why INTELEARN?

- 🎯 **Problem Solved** → Students waste time on irrelevant topics, manual searches, and inconsistent answers.
- 🤖 **Our Solution** → AI-powered platform that analyzes syllabus + PYQs, applies - the **Pareto Principle (80/20 Rule)**, and the realtime Group discussion.
- 🔑 **Key Features** → Personalized dashboard, mind maps, adaptive quizzes, AI chat assistant, progress tracking, bilingual support, Changing theme, Realtime group discussion, Time tracking
- ⚡ **Impact** → Saves time ⌚, reduces stress 😊, and boosts exam performance 📈.
- 🌐 **Vision** → Make smart, affordable, and effective exam preparation accessible to every student.
